Partner with an Experienced Manufacturer

Since starting with a single block machine in 1946, our family-owned, American-based company has grown to be a leader in the concrete construction and landscape products industry. Today we employ a team of 1,500 dedicated people, operate more than 40 locations in six states, and distribute our products nationwide.

With County Materials as your partner, you can design and build outdoor spaces using trusted products that are specified by industry professionals around the United States. As a result, our products are part of growing communities and projects of all sizes, including infrastructure, transportation, commercial, municipal, agricultural, and residential applications.

Leading by Example

As a strong supporter of industry education, County Materials hosts trainings and seminars, including ICPI certifications, NCMA certifications, AIA/CES learning unit presentations, and an Authorized Hardscape Contractor Program to advance our industry.

Showcasing Real-life Project Applications

This catalog is designed with you in mind. The pages are filled with project applications that have been installed by our customers around the country.

We invite you to look through our comprehensive landscape offerings to learn more, and visit us online at www.countymaterials.com.

Elements Paving Stones – Serenity and Vision (border)
with Summit Stone Landscape Units – Haven

Creating Distinctive Hardscape Products with Unmatched Advantages

Our inherently strong and superior performing concrete paving stones and slabs are crafted using face-mix technology. The upper portion of each concrete paver features a permanent blend of our high-strength concrete comprised of vibrant color pigments and surface materials that results in a fine finish. This advanced and automated process concentrates the purest color pigments, finest aggregates and dense concrete mix in the top surface layer of each paving stone where it is visible and matters most. Larger aggregates in the base mix impart added strength that meets ICPI and ASTM standards.

Our commitment to manufacturing excellence doesn't stop with surface beauty. Our pavers and slabs repel stains and withstand every day wear and tear, offering lasting durability, from light pedestrian to heavy vehicular applications.

Their high strength, combined with non-fading colors and natural beauty will stand the test of time. They possess extremely accurate dimensional tolerances, higher surface density, and absorption and abrasion resistance. Our pavers are further enhanced by their appealing and sought after aesthetics, unique to North America.

County Materials began as a concrete block manufacturer more than 70 years ago. As a result, we have acquired extensive knowledge, experience, and manufacturing capabilities for segmental retaining wall units. Our retaining wall systems are ideal solutions for diverse and challenging applications. This includes residential garden walls, raised patios, pillars or seat walls to light commercial and even impressive engineered walls that provide effective soil retention and multi-level terracing advantages. Additionally, all of our wall products compliment our pavers and slab series for cohesive, integrated outdoor spaces.

Face-mix Technology

Fine aggregates and a dense concrete mix are concentrated in the top surface to provide a smooth, refined surface.

Pure color pigments and fine aggregates blended on the surface provide vibrant, rich looking and long-lasting color.

Our face-mix is integrally bonded to the base mix offering exceptional durability combined with outstanding aesthetics for any application.

The base concrete mix features larger aggregates for high compressive strength.

- Made of high strength concrete, high density units resist cracking and damage from freeze-thaw cycles.
- County Materials pavers and slabs are manufactured to meet industry standards for strength, absorption, and are backed by our customer warranty.

**Proud to be American based
and American made since 1946**

Landscape Product Technical Data

Color Selection

Colors shown may vary from actual hues and should only be used as a guide. Refer to actual product samples for final color selection. Because concrete products are manufactured with high quality, naturally-mined aggregates and materials, variations in color or shading should be expected in products that are manufactured at different times and in units having different shapes. This color or shading variation is acceptable in the industry. County Materials recommends immediately verifying the product and color upon receipt, and prior to opening pallets. For any discrepancies, contact your local County Materials representative before installation. Use of product constitutes acceptance.

Proper Color Distribution and Installation

Color of concrete products may vary significantly between production lots. Install concrete units from several pallets to ensure distribution of color. The contractor must install concrete units in accordance with the landscape industry's best practices according to ICPI and NCMA Standard Specifications and the manufacturer's instructions. County Materials is not liable or responsible for loss or damage resulting from improper use, handling or failure to follow installation instructions. Follow all applicable warnings, advisories, and instructions.

Efflorescence

Efflorescence is a naturally occurring process in all concrete products which may appear in the form of a white powdery film on the unit's surface. Efflorescence may be more perceivable in darker colors. It does not, in any way, compromise the functionality or the structural integrity of the product or your installation. Although

efflorescence cannot be prevented, it will wash off over time or it can be cleaned with an industry cleaner. County Materials accepts no responsibility or liability for the occurrence of efflorescence.

Joint Material

There are many different jointing materials specific to application requirements and desired results. Joint material should be completely removed from the surface of the pavers. ASTM C144 specifies natural sand as the paver jointing material for use with County Materials' concrete pavers, along with a sand joint stabilizer. Polymeric sands should not be used on pavers with heavily textured surface. Use of joint material must comply with all instructions provided by the joint material manufacturer, and the joint material method must be performed on a separate mock-up sample not less than 7 feet by 7 feet prior to Buyer approval. County Materials accepts no responsibility or liability for the use of joint material with our concrete pavers.

Polymeric Haze

Polymeric haze from the use of polymeric joint sand may appear on concrete paver products if the sand was not installed properly or removed from the surface of the pavers properly. This does not, in any way, compromise the functionality or the structural integrity of the product or your installation. The hazing will weather away naturally with time and rain. Polymeric haze may be removed with an industry cleaner. County Materials accepts no responsibility or liability for the use of polymeric sand with our concrete pavers or any occurrence of polymeric haze or other undesired result.

Washing Guidelines

Seasonal maintenance is recommended for all County Materials pavers and slabs. General washing guidelines are provided for the following: organic stains, including fruit, soil and leaf residue, algae and moss stains, and efflorescence. For efflorescence stains, wash with a hose and stiff broom or pressure washer. Care must be taken if pressure washing is done to avoid removing excess joint sand or damaging paving material. Water pressure should be comparable to the average pressure from a home watering hose.

Cleaning Agents

Concrete cleaning agents are not required but are an option for all County Materials pavers and slabs. There are many different cleaning agents specific to application requirements and desired results. Use of the cleaning agent must comply with all instructions provided by the cleaning agent manufacturer, and the cleaning agent method must be performed on a separate mock-up sample not less than 7 feet by 7 feet prior to Buyer approval. County Materials accepts no responsibility or liability for the use of cleaning agents on our pavers and slabs.

Sealers

A concrete sealer application is not required on County Materials pavers and slabs but is an option. There are many different sealing agents specific to application requirements and desired results. Use of the sealing agent must comply with all instructions provided by the sealing agent manufacturer, and the sealing agent method must be performed on a separate mock-up panel not less than 7 feet by 7 feet prior to Buyer approval. County Materials accepts no responsibility or liability for the use of sealers on our pavers and slabs.

Construction Residue

A possible by-product of cutting concrete units during installation with a saw is residue-filled water or concrete dust. Residue-filled water or re-hydrated dust can cling to the surface of units and leave a concrete stain. It is recommended to wash and remove the water or concrete dust from the surface of the pavers before it dries. Construction residue can also happen through soil disturbance or environmental elements. These contaminants should be removed immediately; they do not compromise the functionality or the structural integrity of the product or your installation. County Materials accepts no responsibility or liability for the occurrence of construction residue or concrete stains.

Compactor and Snow Removal Equipment

Textured paver and patio stone surfaces require a buffer between the plate compactor and the paver surface to prevent scuffing. Refer to County Materials' Interlocking Concrete Paver or Slab Installation Guidelines. Also, snow removal equipment should have the proper spacing, bumper, and rubber blade guards to protect the surface of the pavers. County Materials accepts no responsibility or liability for damage caused by the use of compaction or snow removal equipment that may leave scuffs, burns or other markings on pavers.

with border of Elements Paving Stones – Reflection

ASTM Guidelines for Interlocking Concrete Pavers and Slabs

County Materials provides general construction guidelines to design professionals and installers of interlocking concrete pavers and concrete slabs. For additional installation information, reference the Interlocking Concrete Pavement Institute's (ICPI) Tech Spec Technical Bulletins.

All interlocking concrete pavers manufactured by County Materials are manufactured in general accordance with industry guidelines.

Characteristics	ASTM C936
Compressive strength	8000 psi at 28 days
Durability to freeze thaw cycles	Total mass loss after 50 cycles, no greater than 1%
Water absorption	Lower than 5%
Dimension tolerance	± 3 mm (1/8") Height ± 1.58 mm (1/16") Length and width

All concrete slabs manufactured by County Materials Corporation are manufactured in general accordance with the following industry guidelines:

Characteristics	ASTM C1782 & C140
Flexural Strength	725 psi (min.)
Freeze-thaw durability with use of de-icing salt	Loss of 225g/m ² max. at 28 cycles Loss of 500g/m ² max. at 49 cycles
Water absorption	6% (max.)
Dimension tolerance	± 3 mm (1/8") Height ± 2 mm (5/64") Length and width
Warpage	± 3 mm (1/8")

Landscape Product Technical Data

Integrity Retaining Wall – Serenity

ASTM C1372 Standard Specifications for Segmental Retaining Wall Units

County Materials provides general construction guidelines to design professionals and installers of concrete retaining wall units. For additional information, reference the National Concrete Masonry Association's (NCMA) SRW Installation Guide.

All concrete retaining wall units manufactured by County Materials are manufactured in general accordance with the following industry guidelines.

Strength and Absorption Requirements (ASTM)		
Minimum Required Net Average Compressive Strength, psi (MPa)		
Average of 3 Units 3000 (20.7)	Individual Unit 2500 (17.2)	
Maximum Water Absorption Requirements		
Weight Classification Oven-Dry Density of Concrete lb/ft3 (kg/m3)		
Light Weight Less than 105 (1682) 18 (288)	Medium Weight 105 (1682) to less than 125 (2002) 15 (240)	Normal Weight 125 (2002) or more 13 (208)

Freeze-thaw Durability: In areas where repeated freezing and thawing under saturated conditions occur, freeze-thaw durability is required to be demonstrated by test or by proven field performance. When testing is required, the units are required to meet the following

when tested in accordance with ASTM C1262, Standard Test Method for Evaluating the Freeze-Thaw Durability of Manufactured Concrete Masonry Units and Related Concrete Units.

County Block Retaining Wall System – Canyon Brown
and Destination Pavers® – Serenity
with Basin Blue – Rip Rap

Warranties for Concrete Landscaping Products

County Materials works continuously to provide value to our customers and enhance our manufacturing capabilities, all while surpassing our high standards of excellence. We manufacture our hardscape products to meet the industry's standards. That is why we back our hardscape products with an exclusive limited Warranty.

County Materials **PAVER** Products Warranty

COUNTY MATERIALS CORPORATION'S CONCRETE PAVERS MEET THE REQUIREMENTS OF APPLICABLE ASTM STANDARD(S). COUNTY MATERIALS WARRANTS ITS CONCRETE PAVERS AGAINST MANUFACTURING DEFECTS FOR THE PERIOD OF YOUR RESIDENTIAL HOME OWNERSHIP. FOR COMMERCIAL PROJECTS, COUNTY MATERIALS WARRANTS ITS CONCRETE PAVERS AGAINST MANUFACTURING DEFECTS FOR 5 YEARS AFTER SUBSTANTIAL COMPLETION OF THE PROJECT. THIS WARRANTY IS NON-TRANSFERABLE. THIS LIMITED WARRANTY DOES NOT APPLY TO DAMAGE CAUSED BY IMPROPER STORAGE, ABRASION, OVERLOADING, OR MISUSE, SUCH AS DELAMINATION, SPLITTING, CHIPPING, OR STAINING. THIS LIMITED WARRANTY APPLIES ONLY IF THE PRODUCTS ARE INSTALLED AS DIRECTED BY THE ICPI (WWW.ICPI.ORG) AND COUNTY MATERIALS' APPLICABLE INSTALLATION GUIDELINES. IMPROPER INSTALLATION VOIDS THIS LIMITED WARRANTY. THE ORIGINAL PROOF OF PURCHASE IS NECESSARY. COLOR MATCHING CANNOT BE GUARANTEED. THE FOREGOING LIMITED WARRANTY IS IN LIEU OF AND EXCLUDES ALL OTHER WRITTEN OR ORAL WARRANTIES, INCLUDING THE IMPLIED WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE AND MERCHANTABILITY. CUSTOMER'S EXCLUSIVE REMEDY FOR BREACH OF THE ABOVE LIMITED WARRANTY IS LIMITED TO COUNTY MATERIALS REPLACING THE PRODUCTS AT NO COST TO THE ORIGINAL CUSTOMER. COUNTY MATERIALS' LIABILITY FOR BREACH OF THE ABOVE LIMITED WARRANTY SHALL NOT EXCEED THE PRICE OF THE PRODUCTS ACTUALLY RECEIVED BY CUSTOMER AND DOES NOT INCLUDE REPLACEMENT LABOR, CONSEQUENTIAL DAMAGES, OR INCIDENTAL DAMAGES.

County Materials **RETAINING WALL** Products Warranty

EXCLUSIVE LIMITED WARRANTY: Seller warrants that stock Products, to the extent they are manufactured by Seller, shall be free from manufacturing defects in materials and workmanship and meet the description and specifications established in Seller's published and internal standards (subject to reasonable variance in accordance with normal industry practice) for a period of thirty (30) days from delivery, and all other warranties are expressly disclaimed as described in the capitalized sentence below. Seller may, in its sole discretion, also rely on any generally accepted industry standards. Seller retains the right, however, to change the dimensions, composition, design, performance, color, and appearance of the Products without liability if, in Seller's judgment, the change is non-material. Seller warrants that non-stock Products manufactured by Seller meet only those specifications and standards provided by Buyer for a period of thirty (30) days from delivery, all other warranties are expressly disclaimed as described in the capitalized sentence below, and Buyer understands that that harmful cracking or other damage may occur if the Product specifications are not properly designed. Seller does not warranty any portion of Products not manufactured by Seller but Seller shall assign to Buyer, upon request, all assignable warranties of Seller's suppliers related to such Products. Acceptance by Buyer of the Products constitutes confirmation that Products meet the description set forth above. THE FOREGOING WARRANTY IS IN LIEU OF AND EXCLUDES ALL OTHER WRITTEN OR ORAL WARRANTIES, INCLUDING THE IMPLIED WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE AND MERCHANTABILITY, WHETHER EXPRESS OR IMPLIED BY LAW, INCLUDING THE UNIFORM COMMERCIAL CODE AS ENACTED IN THE STATE OF WISCONSIN OR ELSEWHERE. This limited warranty only applies if the Products have not been subjected to misuse, negligence, or accident and have not been unloaded, stored, installed, maintained, altered, or repaired in any manner that, in the Seller's judgment, adversely affects the condition or operation of the Products. Further, the foregoing limited warranty and the exclusive remedy below run only in favor of the original Buyer and may not be assigned or otherwise transferred.

EXCLUSIVE REMEDY: For any loss or damage arising out of supplying Products to Buyer, or the sale, operation, or use of the Products—whether such claim is based in contract, warranty, tort (including negligence) or other grounds—BUYER'S EXCLUSIVE REMEDY IS LIMITED, at Seller's sole discretion, to either: (1) refund by the Seller of the purchase price for any non-conforming Products sold hereunder; or (2) the repair or replacement of any non-conforming Products. UNDER THIS EXCLUSIVE REMEDY, BUYER SHALL NOT RECOVER ANY OTHER COSTS FROM THE SELLER, including but not limited to the costs for: return of non-conforming Products, delivery of replacement Products, removal of non-conforming Products, reinstallation of replacement Products (or products purchased to replace any non-conforming Products), and/or any labor charges incurred related to the Products. NO OTHER REMEDY SHALL BE AVAILABLE TO BUYER. ANY CLAIM FOR INCIDENTAL AND/OR CONSEQUENTIAL DAMAGES for lost profits, lost sales, injury to property, or any other incidental or consequential loss IS THEREFORE BARRED PURSUANT TO THE TERMS OF THIS EXCLUSIVE REMEDY. Seller will not be liable for any failure of Products to conform to the Exclusive Limited Warranty above caused by the unloading, storage, installation, or maintenance of the Products, or use of other products/materials in conjunction with the Products that negatively impact the Product or otherwise do not conform with industry standards. The above limitations do not include damages related to personal injury.

Events & Education

County Materials periodically sponsors or hosts various seminars, events or tradeshowes aimed at educating contractors, architects and engineers on hardscape products and practices.

More project owners and construction professionals are requiring hardscape contractors to fulfill and maintain industry-approved training credentials because they recognize the value of using professionals who stand behind their workmanship and uphold industry standards. County Materials actively supports and sponsors industry training and education for professional hardscape contractors to improve the quality of interlocking and permeable paver and retaining wall installations.

Additionally, County Materials provides a variety of industry resources designed to strengthen sales and enhance workmanship to a higher professional level. Improving the quality of paver and retaining wall installations is a win-win for contractors and our industry. Details are available by talking to your County Materials representative, contacting our Customer Service Department at (800) 242-7733 or e-mail us at info@countymaterials.com.

AIA/CES and LA/CES Continuing Education for Credit Seminars

County Materials Corporation, and our industry associate AIA/CES Providers, offer several AIA/CES and LA/CES approved courses for architects, landscape architects, engineers, developers and builders interested in learning more about diverse construction products. Instructors will set up at your work place and provide a complimentary lunch to all program attendees.

Available Courses:

- Concrete Roof Deck Paver System
- Burnished Concrete Masonry
- Decorative Concrete Face & Thru Wall-Load Bearing Brick
- Permeable Paver Design & Performance II
- Concrete Pavers in Commercial Applications
- Concrete Thin Veneers –
The Advantages of Concrete Thin Veneers
- Concrete Masonry Veneer Units

Additional learning seminars are offered to construction and masonry industry professionals. Please contact your County Materials Representative for more information.

Layer Patterns Elements Paving Stones

Note: 4" x 4" fillers (see black squares in illustration for layer pattern "A") are used to keep the integrity of a layer when placed by a machine. They are no charge and not sold separately. If 4" x 4" fillers are used in a pattern and more are needed, installers can cut 4" x 8" pavers in half and install where needed.

Note: Because of our Hammered process, the layer pattern on a pallet of Hammered pavers will not match the layer pattern as illustrated. Hammered pavers also include (8) 4" x 4" fillers in each layer. The fillers are no charge and not sold separately. If fillers are used in a pattern and more are needed, installers can cut 4" x 8" pavers in half and hammer them to get the Hammered look.

Essence Wood Grain Plank Pavers – Custom Color

Essence™ Wood Grain Plank Pavers

Essence Wood Grain Plank Pavers allow you to enjoy the deep rich textures of wood planks with the lasting durability and easy maintenance of concrete.

Essence Wood Grain Plank Pavers – Custom Color

Essence™ Wood Grain Plank Pavers offer the unmatched durability of concrete with authentic looking grain and textures found in weathered wood, but without the maintenance requirements of typical wood products. Deep splits and detailed graining is featured on their surface. Five different plank lengths facilitate a linear laying pattern and create a dramatic effect.

Skylands™ Concrete Deck Pavers

Raise the status of your roof or patio area with Skylands Concrete Deck Pavers. Adjustable pedestals allow for easy installation and can turn pitched roofs into a flat usable surface.

Skylands Concrete Deck Pavers – Vision

Skylands Concrete Deck Pavers – Custom Color

Skylands™ Concrete Deck Pavers are lighter than the industry average; the 24" x 2" x 24" (nominal size) slabs are 24 lbs/sq. ft. Building owners are turning to concrete deck pavers for enhancing previously unusable spaces because of their many advantages:

- Prevents water damage with open joints
- Lengthens roof membrane lifespan by stopping harmful UV rays
- Seamlessly integrates with green roof features
- Roof components below slabs are easily accessible

H₂O Pro® Pavers

Renewable™ Pavers

Harmony™ Permeable Pavers

Permeable Interlocking Concrete Pavers

Permeable concrete pavers are the ideal solution for storm water management.

Permeable concrete pavers are designed to allow storm water to pass through paver joints directly into the ground, the use of permeable concrete pavers is proven and widely recognized by many municipalities, state agencies, shoreland and watershed districts for meeting EPA-mandated standards.

Permeable concrete paver systems help to improve water quality by capturing contaminants and suspended solids in storm water and filtering them through layers of aggregates. This also reduces the risk and severity of flooding, eliminates surface puddling and reduces the time for snow and ice removal by speeding up the melting process. Additionally, where space is at a premium, permeable concrete pavers

help to maximize land use on the total building site for residential and commercial applications, typically replacing traditional retention and detention ponds.

Top 5 Reasons for Choosing Permeable Concrete Pavers

1. Increased profits: Gain a developable lot.
2. Reduction in risk associated with ponds (accidents, injuries, pests etc.).
3. Reduction in risk associated with freeze-thaw/standing water.
4. Increased curb appeal: Added aesthetic value.
5. Lower maintenance costs than traditional pavement.

County Materials is leading the industry in our commitment to storm water management by collaborating on a permeable paver test plot project in Madison, Wisconsin with the Wisconsin Department of Natural Resources and the Wisconsin Department of Transportation. Facilitated by the USGS, the test plot will enable researchers to accurately assess the effectiveness of permeable pavers in diverting and filtering storm water runoff.

Learn more about this test plot and other case studies by visiting www.countymaterials.com

H₂O Pro Pavers – Serenity
with Summit Stone Landscape Units – Solace
(Shown with optional Steel Fire Pit Insert)

H₂O Pro[®] Pavers

Permeable Paving Units

H₂O Pro Pavers are manufactured in three dimensionally compatible sizes with hidden spacers.

H₂O Pro® Pavers accommodate high pedestrian areas and wheelchair traffic, making them a suitable option for entrances, walkways and retail courtyards. Their 3¹/₈" (80 mm) thickness also withstands heavy low speed vehicular loads.

Sizes & Patterns **H₂O Pro Pavers**

		D x H x L (Nominal Size) Inches • Millimeters	SF/Unit	Units/ SF	SF/ Layer	Layers/ Pallet	SF/ Pallet	Units/ Layer	Units/ Pallet	Lbs/ Pallet

- Installed joint dimensions = 10 mm (²⁵/₆₄")
- Installed open area/layer = ±9.1% (depending on pattern)

H₂O Pro Pavers Permeable Layer Patterns

Note: The 4" x 8" size of H₂O Pro Pavers are manufactured in a herringbone layer pattern that easily accommodates mechanical installation. Units can also be installed in many different patterns by hand.

Note: 4" x 4" fillers (see black squares in illustration for layer pattern "A") are used to keep the integrity of a layer when placed by a machine. They are provided at no charge and not sold separately. If 4" x 4" fillers are used in a pattern and more are needed, installers can cut 4" x 8" pavers in half and install where needed.

Renewable™ Pavers

Permeable & Sandset Pavers

Renewable Pavers combine the integrity of an interlocking paver with the advantages of a permeable concrete paver system.

Renewable™ Pavers' larger joints accommodate drainage aggregates and units have hidden tabs. Renewable Pavers can also be manufactured as sandset units with smaller hidden tabs that hold jointing sand for non-permeable surfaces.

Dimetta Pavers Layer Pattern

Notes:

- Textured paver and patio stone surfaces require a buffer between the plate compactor and the paver surface to prevent scuffing. Refer to County Materials' Interlocking Concrete Paver or Slab Installation Guidelines, or contact County Materials for information.
- Making (2) cuts from corner to corner on one unit allows for a multitude of additional pattern designs.
- When working around an object (i.e. firepit) make sure to use string lines for proper alignment, keeping joints and tips in line.
- Keep joints snug but not tight- Allow enough room to accommodate slight adjustment in units to keep joints in line, especially when multiple points come together in a pattern.

The color photos shown in this catalog were prepared with careful attention to accuracy. However, colors shown may vary from actual hues and should only be used as a guide. Refer to actual product samples for final color selection. Because concrete units are manufactured with high quality, naturally-mined aggregates and materials, variations in color or shading should be expected in products that are manufactured at different times and in units having different shapes. This color or shading variation is acceptable in the industry.

Rib Rock Landscape Block – Gray – Rough

Rib RockTM Landscape Block

Engineered for the most challenging applications, Rib Rock Landscape Block effortlessly builds oversize walls. Their large scale and natural aesthetics make a dramatic statement.

Rib Rock™ Landscape Block can easily construct walls from 6 feet to 20 feet high with additional site-specific engineering. Their size speeds up construction allowing for more square footage to be placed at one time, and their interlocking design allows for easy installation and enhanced security. Manufactured to hold back a lot of earth, Rib Rock units are the perfect solution for demanding projects that require lasting strength and enhanced durability.

Tribute Retaining Wall System – Canyon Brown – Rustic

Tribute[®] Retaining Wall System

The Tribute Retaining Wall System is engineered for ease of use and maximum versatility.

Tribute[®]
RETAINING WALL SYSTEM

Tribute Retaining Wall System – Custom Color

The **Tribute® Retaining Wall System** features solid block with multiple pin grooves on the top surface that allow for a combination of retaining and freestanding wall options, including vertical, stepped out or set back applications. Units can be efficiently split in half in the field to construct pillars or other wall accents, a perfect finishing touch to any project. With its countless design capabilities, Tribute Retaining Wall units are the premier choice for simple to ambitious landscape applications, including freestanding seat walls, steps, terraces and slope protection.

Note: Retaining Wall Caps are available (Information is located on page 153).

Wall Configurations **Tribute Retaining Wall System**

Tribute retaining walls with pins:

Each Tribute unit has a unique three-position pin placement system. Two pins per unit secure Tribute block in place.

• **Tribute Two-sided Vertical Face Seat Wall Installation**

It is recommended that all seat walls have the first course buried for embedment. Starting on the second and succeeding courses, position all Tribute units with the pinholes over the middle-receiving channel. This will lock the units in a vertical position. Seat walls should not exceed a height of 36".

• **Tribute Two-sided Recessed Face Seat Wall Installation**

Starting with the second course, randomly place Tribute units over one of the receiving channels. Continue randomly positioning succeeding rows of units in the receiving channels on the remaining courses. This will give your Tribute retaining wall system a three dimensional look.

• **Tribute Set Back Retaining Wall Installation**

Position pinholes of each successive Tribute unit over the rear-receiving channel on the lower unit. This placement will give your Tribute wall an approximate 7° set back.

Seat Walls and Columns Design **Tribute Retaining Wall System**

Finished Ends and Corners on Tribute Two-sided Seat Wall Installations

To finish your free standing seat wall on each end, split 2" off the back of each unit at the indicated grooves for a two-sided split appearance on the front and back faces. Then split the unit in half (front to back) at the indicated center notch to achieve two half blocks with three split sides. At your desired seat wall starting point, place one half block with a split surface facing out (Figure 2). Next install full units side-by-side for the length of the seat wall. End the course by placing another half block with a split surface facing out.

Second course: Split another two sided Tribute unit in half as before. On one half block, measure and mark the width of one face at 2-7/8". On the other split face, measure and mark its width at 4 -7/8". Draw a line between each marked face and saw the unit along the appropriate angle to create a specially cut two-sided 1/4 return unit. Place one sawed 1/4 piece, split surface out, on the end of the first course to start the second course. Make sure the cut angle of this second course unit is opposite of the angle in the first course for proper bond. Use retaining wall adhesive to hold all end pieces securely in place. Continue laying standard units side-by-side, and install the other 1/4 return unit at the end of the seat wall following the same instructions.

Continue building successive courses by repeating instructions above, alternating each 1/4 return end unit and using adhesive for proper stability. When the seat wall is finished to the proper height, adhere caps for a finished effect.

Figure 2 Tribute Two-sided Seat Wall

Courses 1,3,5...

Courses 2,4,6...

Constructing Columns and Pillars with Tribute units:

Split Tribute units in half (as shown). Place four half units per course in alternating running bond pattern. Apply concrete adhesive between each course as you construct the pillar. The hollow area inside a pillar can accommodate electrical conduit for a light or a wood 4" x 4" post to support a trellis, light or garden gate.

Tribute Retaining Wall System – Silvertone

Tribute Retaining Wall System – Silvertone

County Block[®] Retaining Wall System

The County Block Retaining Wall System blends seamlessly in classic and contemporary landscape settings.

County Block Retaining Wall System – Silvertone – Heavy Rustic
with Elements Paving Stones – Timeless – Barrel Tumbled

County Block Jumbo Retaining Wall System – Canyon Brown

Designed with versatility in mind, **County Block® Retaining Wall System** is an impeccable solution for planting beds, steps or multi-level terraces. Installation is simple with its pin system. When filled with aggregate, the cored units provide one of the strongest and longest lasting connections available without the hassle or costs of mortar, special equipment or hard-to-find tools.

Crafted in a split face or rustic finish, County Block units harmonize with County Materials' line of landscaping products. Manufactured with high-strength and low absorption concrete and natural elements, the County Block Retaining Wall System is designed to withstand weather extremes while offering years of maintenance-free beauty.

Note: Retaining Wall Caps are available (Information is located on page 153).

The color photos shown in this catalog were prepared with careful attention to accuracy. However, colors shown may vary from actual hues and should only be used as a guide. Refer to actual product samples for final color selection. Because concrete units are manufactured with high quality, naturally-mined aggregates and materials, variations in color or shading should be expected in products that are manufactured at different times and in units having different shapes. This color or shading variation is acceptable in the industry.

Summit Stone Landscape Units – Solace and Timeless
with Grand Milestone Pavers – Serenity

Summit Stone® Landscape Units

Summit Stone Landscape Units offer incredible design flexibility for creating almost any outdoor landscape features.

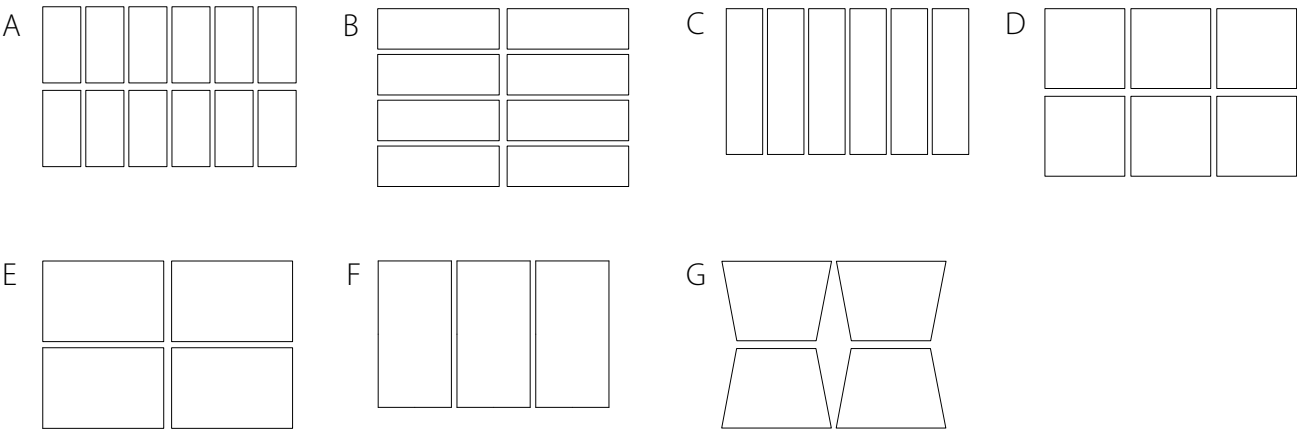

Summit Stone® Landscape Units' dimensional shape and multiple unit sizes make them ideal for constructing custom outdoor fireplaces and kitchens, built in grills, seat walls, pillars and more. Summit Stone's weathered finish is the crowning touch that compliments County Materials' line of landscaping products.

Sizes Summit Stone Landscape Units

- Calculate the number of Summit Stone needed:
 - for a 10-7/8" thick wall: SF x 5.84
 - for a 7-1/4" thick wall: SF x 3.65

Fireplaces Summit Stone Landscape Units

Summit Stone Standard Fireplace

Standard Fireplace components include:

- (5) - 6" concrete block
- (5) - 3" soaps
- (14) - Summit Stone ($7\frac{1}{4}" \times 3\frac{5}{8}" \times 10\frac{7}{8}"$) units special cut ($\frac{1}{3}$ and $\frac{2}{3}$)
- (1) - 10 lbs. pail of Heat Stop II refractory clay
- (75) - fire brick $2\frac{1}{2}"$ thick
- (1) - $47" \times 3\frac{1}{2}" \times 3\frac{1}{2}"$ steel lintel
- (1 left and 1 right) - Summit Stone ($7\frac{1}{4}" \times 3\frac{5}{8}" \times 10\frac{7}{8}"$) special cut lintel pad unit

- In addition to the standard fireplace components listed above, 320 Summit Stone ($7\frac{1}{4}" \times 3\frac{5}{8}" \times 10\frac{7}{8}"$) are needed to complete project.
- Concrete adhesive is sold separately. Approx. 10-12 tubes of adhesive will be required, depending on the quantity applied to each Summit Stone.

Approx. 8000 lbs. - 3 total pallets

Product	Size D x H x L (inches)
Summit Fireplace Standard	$54\frac{3}{4} \times 79\frac{3}{4} \times 84\frac{1}{4}$

Summit Stone Double Woodbox Fireplace

Double Woodbox Fireplace components include:

- (5) - 6" concrete block
- (16) - 4" concrete block
- (5) - 3" soaps
- (18) - Summit Stone ($7\frac{1}{4}" \times 3\frac{5}{8}" \times 10\frac{7}{8}"$) units special cut ($\frac{1}{3}$ and $\frac{2}{3}$)
- (1) - 10 lbs. pail of Heat Stop II refractory clay
- (75) - fire brick $2\frac{1}{2}"$ thick
- (1) - $47" \times 3\frac{1}{2}" \times 3\frac{1}{2}"$ steel lintel
- (2) - $42" \times 3\frac{1}{2}" \times 3\frac{1}{2}"$ steel lintels
- (1 left and 1 right) - Summit Stone ($7\frac{1}{4}" \times 3\frac{5}{8}" \times 10\frac{7}{8}"$) special cut lintel pad unit
- (2) - Summit Stone ($7\frac{1}{4}" \times 3\frac{5}{8}" \times 10\frac{7}{8}"$) units special cut common grooved lintel pad

- In addition to the double woodbox fireplace components listed above, 500 Summit Stone ($7\frac{1}{4}" \times 3\frac{5}{8}" \times 10\frac{7}{8}"$) are needed to complete project.
- Concrete adhesive is sold separately. Approx. 10-12 tubes of adhesive will be required, depending on the quantity applied to each Summit Stone.

Approx. 12,000 lbs. - 5 total pallets

Product	Size D x H x L (inches)
Summit Fireplace Double Woodbox	$54 \times 79\frac{3}{4} \times 141\frac{3}{8}$

Disclaimer: This is a basic outdoor fireplace kit design. Outdoor fireplaces should always be constructed by a knowledgeable professional. Location, chimney height, flue size and prevailing winds can affect the performance of an outdoor fireplace. County Materials cannot guarantee the performance or structural integrity of this fireplace. Use only industry accepted materials, cements and adhesives when constructing an outdoor fireplace. Always observe building codes and local bylaws.

Summit Stone Corner Fireplace

Product	Size D x H x L (inches)
Summit Fireplace Corner	82 x 79 3/4 x 104

Corner Fireplace components include:

- (20) - 8" 1/4 concrete block
- (5) - 6" concrete block
- (20) - 4" concrete block
- (5) - 3" soaps
- (54) - Summit Stone (7 1/4" x 3 5/8" x 10 7/8") units special cut (1/3 and 2/3)
- (1) - 10 lbs. pail of Heat Stop II refractory clay
- (75) - fire brick 2 1/2" thick
- (1) - 47" x 3 1/2" x 3 1/2" steel lintel
- (1 left and 1 right) - Summit Stone (7 1/4" x 3 5/8" x 10 7/8") special cut lintel pad unit
- (2) - Summit Stone (7 1/4" x 3 5/8" x 10 7/8") units special cut common grooved lintel pad
- In addition to the corner fireplace components listed above, 420 Summit Stone (7 1/4" x 3 5/8" x 10 7/8") are needed to complete project.
- Concrete adhesive is sold separately. Approx. 10-12 tubes of adhesive will be required, depending on the quantity applied to each Summit Stone.

Approx. 10,320 lbs. - 4 total pallets

Fire Pits and Serpentine Wall Designs Summit Stone Landscape Units

Summit Stone Circular Fire Pit Design

Shown with optional Steel Fire Pit Insert

Summit Stone G Tapered Unit

The Summit Stone G Tapered Unit can be used to design circular or square Fire Pits and Serpentine Walls. The G Tapered Unit is available in 4 colors (Haven, Hush, Solace and Timeless) and sold by the unit.

36" Diameter Fire Pit Design Estimate

- (17) "G" units per layer
- 54" outside and 39" inside diameters

42" Diameter Fire Pit Design Estimate

- (17) "G" units and 2 "A" units per layer
- 59" outside and 44" inside diameters

48" Diameter Fire Pit Design Estimate

- (16) "G" units and (6) "A" units per layer
- 66" outside and 51" inside diameters

Larger Diameter Fire Pits

Larger diameter firepit designs can be accommodated if desired by adding additional "G" and "A" units per layer.

NEW for 2018!

Summit Stone Square Fire Pit Design

Shown with optional Square Steel Fire Pit Insert

36" Square Fire Pit Design Estimate

- 3 layers high (30) "A" units, (12) "B" units and (12) "C" units.
- 50.75" outside and 36.25" inside dimensions

- Optional Steel Fire Pit Inserts – Circular or Square (sold separately)
- Optional Firebrick splits (sold separately)
- Refer to Fire Pit Inserts on page 179

Summit Stone 3' High Serpentine Wall Design

Pillar Construction Summit Stone Landscape Units

Decorative Pillars

Summit Stone® is designed to let you build decorative pillars as individual accents or in combination with small decorative walls. No cutting or fitting is required.

To make a pillar with Summit Stone, place units in alternating layers as shown in the illustration below. Make sure you build on level and well compacted ground and recommended base pad. (Ask a Summit Stone dealer for guidelines.)

Apply concrete adhesive between each course as you construct the pillar. Place adhesive on the touching ends and undersides of each cap unit.

The hollow area inside of each pillar can accommodate electrical conduit for a light or a wood 4" x 4" to support a trellis, a lamp post or a garden gate.

NOTE: Outside measurements of cap layer will be approximately 22"x 22". Post and wall heights should not exceed 36". For decorative walls, columns and steps, 1 to 2 layers of Summit Stone units should be buried below grade for proper embedment.

Pillars with Electrical Conduit

- Sonotube must be placed 4' below grade.
- 24" x 24" x 4" concrete base is joined to the sonotube column with rebar.
- Conduit is placed 12" – 18" below grade (min.).
- Place units in alternating layers as shown below.
- Build on level and well-compacted ground and recommended base pad.
- Apply concrete adhesive between each course.

Seat Walls, Alcoves and Tables Summit Stone Landscape Units

Seat Wall Patterns

Create Seat Walls that define the boundaries of your outdoor living patio spaces.

Seat Walls: Formula for calculating Linear Feet

7 block per lineal foot.

Example: A 10-foot wall requires 70 block.

Special Features: Surrounds/Alcoves for Grills, Refrigerators, etc.

Enhance Your Outdoor Living Space

Outdoor kitchen appliances can be nestled into coves constructed of Summit Stone Tumbled Landscape Units, giving your outdoor living space an attractive, completed appearance.

Reflection Stone[®] Masonry Units

Reflection Stone Masonry Units combine the advantages of a high strength concrete veneer with the timeless character of natural hand-hewn stone.

Reflection Stone and Reflection Stone GRAND – Enchantment

Reflection Stone and Reflection Stone GRAND – Inspired

Reflection Stone® Masonry Units make an impression by mirroring the craftsmanship of centuries old stonework. County Materials' Reflection Stone line is available in three size modules: Reflection Stone, Reflection Stone GRAND and Reflection Brick. Each size can be installed as a stand-alone series or combined for custom applications. The Reflection Stone series is also available in full and thin veneer units, making them ideally suited for interior and exterior applications.

Align International

Natural Stone Veneer Collection

Whether Align International products are used indoors or out, for new construction or major remodels and renovations, contractors and architects recognize and appreciate the line's quality materials and ease of installation.

Align International – Autumn Leaf

Align International products are unlike many other natural thin stones that typically require sizing, cutting and fitting individual pieces in a project. Align International components allow for a faster and more economical construction process with minimal cutting. Thin veneer panels are easy to handle and fit together seamlessly to replicate the look of custom handcrafted stonework.

Isokern Fireplace, Oven and Chimney Products

After 70 years of unparalleled performance in the construction industry, Earthcore's Isokern line has become the most trusted modular system in the world. Isokern Fireplace & Chimney components are lightweight, while retaining UL 127 and UL 103HT (respectively) listings. Consequently, Isokern Fireplace & Chimney Systems are less expensive to install than traditional masonry fireplaces. And, unlike typical metal box fireplaces or concrete systems, they are built to last forever.
